Class: Tou08e
Studiengang: Tourismus
Cooperation Exchange to: North West
University, Potchefstroom Campus,
Potchefstroom, South Africa

Goeie Môre, Hoe gaan dit?

I chose to do an exchange to South Africa to broaden my knowledge of other country and especially in South Africa of several different cultures living together. Furthermore to gain a once in a lifetime experience to study at another university

In wonderful South Africa I was really impressed how people live together which used to be separated for several decades as well of the friendliness of the people and how welcoming they are to foreigners?

The experiences in Potchefstroom and on my trip around the World Cup where huge to life the first time in my live in a mostly black community and the nature in this wide land is incredible and a must see for everyone, with all the wildlife the country has to offer.

I hope I can profit from the way the lectures are given in South Africa in a way that I keep up my learning like I had to at the North West University, due to the several class tests which were written all the time, which really helped me to get back into studying not only in the last minute.

The support of the International Office was good and at the beginning helped me a lot when I started to plan my exchange to South Africa.

If I would do it again, for sure it was a huge experience and I really enjoyed my stay at the university and would appreciate if the time could go on

For all future exchange students: This is your chance to discover something completely new and totally different. The studies need a lot of effort but the experience behind is recommendable to everybody, so contact the International Office to fix your ticket to South Africa.
