

A Exchange Semester in Chur

I am Ran, a tourism student from Thompson Rivers University in Canada to HTW Chur in Switzerland. While I was in Chur, I stayed on Konvikt, which we could see a wonderful panorama view of Chur every day. There are over 10 HTW students living on the same floor, so it was very easy to make friends, and students I met in Chur was kind and helpful.

The primly reason why I decided to do exchange semester was to know other cultures, traditions, and more people to open my eyes. It was my first time to come in Europe, so I faced to many different cultures as well as difficulty, but there are many friends and supporters always. The University, for example, the lecture style and grading system were quite different from my home university. It takes me few weeks to get used to, but I liked this style especially excursions with friendly classmates. I have learned a lot of Swiss resorts, organizations and cultures. Also, I believe that these experiences I had in Switzerland will be profitable in my future because I learned to not only Swiss culture but also other countries in Europe such as British, Turkish, Italian, German, Hungarian, Moldavian cultures.

I totally recommend to my friends to do exchange semester, and if I had another opportunity to do exchange semester, of cause I would do.

I appreciate for all of organizations, advisers, students, and my family, who supported me, this experience was very good opportunity to gain my experience and think about my future.
